SUMMARY

A full-stack developer with 5+ years of experience, and a passion for developing applications in Ruby on Rails, React, and Javascript, built over 20+ projects using different tech stacks with user accessibility and pixel-perfect design. Collaborated with 50+ developers across the world remotely and I had the chance to work with teams and deliver projects successfully. I am a passionate software developer and believe in creating something new out of the box.

SKILLS

Front-End: JavaScript, React, Redux, HTML5, CSS3

Back-End: Ruby, Rails, MySQL, Postgresql, Python, NodeJs

Tools & Methods: Git, GitHub, Heroku, Jest, RSpec, TDD, Chrome Dev Tools, Agile Development

Professional: Remote Pair-Programming, Teamwork, Mentoring, Multicultural Work experience.

EXPERIENCE

UNI-TY INC. Osaka, Japan

Software developer

February 2024 –

- Collaborating closely with cross-functional teams, including peer developers, designers, and sound engineers to understand project requirements and implement solutions that met business goals.
- Actively participated in code reviews and contributed to enhancing coding standards.
- Identifying and resolving complex technical issues to facilitate a smoother development process

Daanfe Software Labs, Kathmandu, Nepal

Software developer

January 2023 – January 2024

- Propose improvements to code organization to improve code quality and overall performance by 50%.
- Led the development and deployment of web applications using Ruby, React, and JavaScript, meeting project deadlines and ensuring high-quality deliverables.
- Collaborated closely with cross-functional teams, including designers, product managers, and quality assurance, to understand project requirements and implement solutions that met business goals.

- Actively participated in code reviews and contributed to enhancing coding standards, resulting in improved code quality and maintainability.
- Implemented automated testing processes, reducing bugs and errors by 30% and enhancing the overall reliability of applications.
- Continuously stay updated with the latest industry trends and emerging technologies, attending conferences and workshops to incorporate new knowledge and techniques into project work.

Microverse Inc, USA

Mentor of junior developers

May 2022 – May 2024

- Mentored two junior web developers every week, and provided technical support through code reviews.
- Proposed improvements to code organization to improve code quality and overall performance.
- Provided advice and tips on how to maintain motivation to maintain longevity in the program.

Remote

Freelancer Full Stack Developer

August 2018 – November 2022

- Successfully completed 20+ diverse web projects, showcasing adaptability to various client requirements and industries.
- Employed best practices to optimize website performance and speed, enhancing user experience and search engine rankings.
- Implemented robust security measures to protect websites from potential threats, ensuring data integrity and user privacy.
- Actively collaborated with clients to gather project requirements, ensuring a clear understanding of their goals and objectives.
- Demonstrated exceptional time management skills, consistently delivering projects on or ahead of schedule while maintaining high-quality standards.
- Continuously stay updated with the latest industry trends and emerging technologies, attending conferences and workshops to incorporate new knowledge and techniques into project work.
- Collaborated with developers worldwide from small to large-scale teams.

EDUCATION

TRIBHUVAN UNIVERSITY

November 2005–July 2008

Bachelor in Science, Major in Physics, Minor in Mathematics

- Developed expertise in critical thinking and computational thinking, enabling me to understand algorithms and system design processes.
- Acquired proficiency in advanced mathematical topics like calculus and integration, facilitating efficient software development and debugging.
- Gained hands-on experience in translating theoretical knowledge into practical skills for real-world challenges.

TRAINING

MICROVERSE

May 2022 – March 2023

Remote Full Stack Web Development Program, Full-Time

- Spent 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with Ruby, Rails, JavaScript, React, and Redux.
- Developed skills in remote pair programming using GitHub, industry-standard git-flow, and daily standups to communicate and collaborate with international remote developers.
- Participated in Cross-Cultural Collaboration, and had the opportunity to work with a diverse group of international developers.
- Exposed to agile development methodologies and best practices. participated in daily standup meetings, and engaged in iterative development cycles.

PROJECTS

Fluid

2018 January – Present

Fluid is a Platform to digitize small businesses! It allows businesses to summon leads, engage customers, and promote their brand from anywhere. They can interact with their customers – wherever they are – with highly customized, digital shopping experiences that follow best-in-class e-commerce practices.

- Built with: (React, Redux, Jest, Redux, Redis, PostgreSQL, Ruby, Rails, and Rspec)

Coder's Hub

2022 November – 2023 February

Coders-Hub application allows users to reverse different online classes depending on their preferences. They are assigned a mentor for each course and can choose how long they want to participate.

- Built with: (React, Redux, JavaScript, RestAPI Ruby, Ruby on Rails, Jest, Rspec and DoorKeeper)

Recipe App

2022 September – 2022 November

The recipe App is an application that allows you to keep track of recipes, inventory, and ingredients, generate shopping lists for ingredients you lack for a recipe, and share your recipes (depending on their public or private status).

- Built with: (Ruby, Ruby on Rails, Rspec, Bootstrap, CSS3)

Coin Tracker

2022 July – 2022 August

Coin Tracker provides real-time market-based information and statistics about the top 52 cryptocurrencies.

- Built with: (React, Redux, JavaScript, RestAPI CSS3, and Jest,)

Expense Tracker

2021 June – 2021 July

A Ruby on Rails mobile web app that helps users manage their budget with transaction lists categorized for easy expense tracking.

- Built with (Ruby, Ruby on Rails, Bootstrap, Rspec, and PostgreSQL)
